Examples of Violations (Note that this list is NOT all-inclusive, merely some examples of each inspection item #)

	J	
1. *	Approved	Dented cans, rusted, pitted
	Source,	No shellfish tags, unable to determine source from invoices
	Wholesome	Shellfish source not on Certified Shellfish Shipper's List
		• Use of raw milk
		Adulterated foods on premises
		Sulfite added to food
		Mold in food
		Cracked whole shell eggs (upon receipt of delivery) Will a describe the state of the state
		Wild mushrooms that were foraged and not grown commercially Head to be a second of the control of the con
		 Hunted game used (donations to charitable organizations OK) Fin fish not from commercial source
		1
		Meat & poultry not from USDA approved source (unless approved local poultry)
		Foreign substance in food
		PHF not delivered at required temps.
		 Shellfish, shell eggs, not received at ambient temperature ≤ 45°
		Water or smoke damaged food
		Home canned / cooked food
		Rust dripping into ice (within ice machine)
		Spoiled food in walk-in
		Not freezing fish to be served for consumption w/o cooking (i.e. sushi) –
		validate capability to freeze at required temps
		Using a container which previously held chemicals to store food
2.	Original	Incomplete info on shellfish tag
	container,	 Shellstock tags not stored with each batch of shellfish
	properly	 No dealer or re-shipper tag for shellfish, but can verify source by invoices
	labeled	Tags not saved 90 days/ or in chronological order
		Shucked shellfish not in original container
		Granulated, powdered & liquid food not labeled
		Label missing
2 "	1 D (() D	Label not in English (21 CFR 101.15c)
3. *	* Potentially	Consumer Advisory does not contain both Disclosure and Reminder of foods
	hazardous food meets	which are or may contain raw or partially cooked ingredients
	temp	 PHFs not reheated to 165°F within 2 hours for hot holding PFHs held above 45°F or below 140°F
	requirements	 PFHs held above 45°F or below 140°F Poultry not cooked to 165°F for 15 seconds
	during storage,	 Pork (other than whole roasts) not cooked to 145°F for 15 seconds
	preparation,	Eggs not cooked to 145°F for 15 seconds
	display,	• Fish not cooked to 145°F for 15 seconds
	service, &	Whole Roast beef & pork not cooked to 130°F (121 minutes), 140°F (12
	transportation	minutes), 145°F (3 minutes)
		 Properly cooked whole beef or pork roast not held ≥ 130°F
		• Ground beef not cooked to 158°F instantly, 155°F 15 sec.
		Foods taken from hermetically sealed packages not heated to 140°F
		• Improper cooling (not 140°F →70°F/2hrs; 70°F→45°F/4 hrs)
		Time as a public health control used without written approval from the DOH
		 Raw animal food cooked in microwave not cooked to 165°F for 15 sec.
4. *	* Adequate	Thermometers not calibrated, accurate within 2°F
	facilities to	No thermometer in refrigerators or external temperature gauge
	maintain	 Refrigerator thermometer not working or not accurate to within 2°F
	product	Poorly placed thermometer – not in warmest part of refrigerator
	temperature, thermometers	Food thermometer not readily accessible
	provided	• Refrigerator not maintaining food temperatures at ≤ 45°F
	P. 5 . 1404	• Holding units using ice that are not maintaining temperatures at $\leq 45^{\circ}$ F
		Insufficient number/capacity of hot/cold holding/storage devices
ĺ		

		Freezer not keeping freezen foods freezen
		 Freezer not keeping frozen foods frozen No thin-probe TMD for thin foods (inadequate thermometer for food product
		or taking temperatures)
5.	PHF properly	Thawing at room temp
٥.	thawed	Thawing at room temp Thawing in stagnant water
	tha wea	• Thawing in stagnant water • Thawing in water > 70°
6.	Unwrapped or	Re-serving butter packets, creamers, or milk
0.	PHF not re-	 Reusing uneaten bread/rolls from customer tables
	served	 Bar snack food left out (between service)
	501 100	 Note: salad bar food is "displayed", not "served" food. It must be protected,
		have appropriate temperature control, and supervision.
7. *	Food	Public access through food preparation, warewashing or dispensing areas
	protected:	(unauthorized personnel)
	storage, prep,	Nesting of container or outside packaging on top of exposed foods
	display, service	Glasses/containers of juice, beer, or wine stored in ice at bar if ice is being
	& transport	used as food item
		 Raw meat stored above/adjacent to ready-to-eat foods
		 Raw meats not stored vertically according to final cooking temperatures
		 No shields on lights in food preparation, cooking, or storage areas
		 Transporting salad ingredients to salad bar uncovered
		 Fruits and vegetables not washed (rinsed) prior to cutting, preparing or
		offering as a ready-to-eat food
		 Produce washed in handwashing sink (also #15 violation)
		 Uncovered foods in storage
		 Inadequate sneeze guard in food service area
		 Inadequate/no splash guard between handsink and food prep areas
		Uncut loaves of bread on buffet for self-service
		• Fly control devices above food prep areas, warewashing areas, food storage,
		dishes, etc.
		• Food (including canned goods) stored under waste lines
		Allowing buffet customers to return with unclean plates/utensils Outdoorsets designing and food on food and applications are the income and the control of the contro
		Condensate dripping onto food or food packages in walk-in Evenosed conding or mints
		Exposed candies or mintsFood preparation on top of garbage can
		 Food stored in undrained ice or water except for whole fruit or raw whole or
		cut vegetables
		Ice machine stored below sewer line
		Unpasteurized pooled eggs not cooked immediately
		 Not using pasteurized eggs if pooling eggs
		Cracked or broken shell eggs located in the establishment
		Uncovered ice in service bins
		 Non-foodservice related items stored in walk-in refrigerator with food
		(ornamental flowers, employee lunches, etc.)
		 Beverage bottles and cans stored in ice, with necks below ice
8. *	Food	 Food stored on floor
	containers	 Storing exposed food less than 18" off floor
	stored on floor	 Storing non-exposed food less than 12" off floor
9. *	Handling of	 Plating French fries with bare hands
	food	 Placing chicken, beef on cooking surface using unprotected hands
	minimized	 Assembling burgers or sandwiches with bare hands
		 Wait staff filling roll/bread baskets with bare hands
		 Using a glass or bare hands as a scoop to dispense ice
		 Cup or container with no handle used as food scoop
		 Unnecessary, excessive touching of foods with bare hands
		Tossing/mixing salad with bare hands
10.	Food	 Ice scoop buried or stored in ice with the handle touching the ice
	dispensing	 Flour/sugar scoop stored in flour with handle in product
	utensils	 Storing dispensing utensils in stagnant water

	T	
		 In-use knives wedged between prep tables
	properly	Dispensing utensils in dipper well without running water
	stored	In-use utensils stored in sanitizing solution
	(Applies to in-	• In-use tongs hanging from equipment (e.g.: oven door handle)
	use equipment)	In-use utensils placed on soiled table tops or shelves
		In-use utensils stored in hot water bath less than 140° F &/or bath water is
		dirty
		· · · · · · · · · · · · · · · · · · ·
		Wiping an in-use knife or utensil on cloth towel/apron
		Food thermometer not stored in case, with probe end exposed
		Utensil stored in food product does not have handle extending out of the food
		product
11.	Toxic items	Toxics, including cooking fuel, pesticides, medication, sanitizers stored with
	properly	food
	stored, labeled,	Unlabeled chemical containers
	used	Sanitizer concentration exceeds maximum designated for sanitization (may)
		leave a toxic residue)(e.g. chlorine solution > 200ppm)
		Unnecessary toxics in food establishment
		Rodenticides and insecticides stored with bactericides and cleaning
		compounds
		Polish containing cyanide being used
		Use of chemical containers for storing food (also a #1 violation and)
		destruction necessary)
		Improper spraying of chemicals/pesticides near food
		 Wiping cloth containers (w/ sanitizer) not labeled
12. *	Personnel with	
12.	infection	Employee with infected & exposed wound, sore, boil, burn HENY Line 1. L
		Ill FW not excluded from establishment for the necessary period of time
	restricted	Manager not reporting ill FW to health department
13. *	O O	 No handwashing sink within or immediately adjacent to all toilet rooms
	facilities	 Handwashing facilities not available, accessible or conveniently located for
	provided,	prep area, food dispensing area, ware washing area
	hands washed,	 Food workers not washing hands before starting work, immediately before
	clean	engaging in food prep activities, and after engaging in any activity that
		contaminates the hands
		Improper handwash procedure
		Dirty hands or nails
		Handwash sink blocked by equipment
14.	Clean outer	FW wearing badly soiled apron
1	clothes,	FW with long uncovered beard, mustache
	effective hair	Ineffective hair restraint
	restraints	
15 4		No hair restraint
15. *	Good hygienic	Foodworker smoking or eating in food prep, service or warewashing areas
	practices;	Foodworker washing/rinsing hands in a sink other than a designated
	smoking	handwashing sink
	restricted	Fingernails not trimmed
1		 Foodworker with artificial fingernails or nails with polish not wearing proper
1		gloves
		Handbags stored in food preparation area
1		Mop water dumped into any sink other than slop/mop sink
		Foodworker with bandaged hand not wearing gloves
1		Floor mops & floor mats washed in dishmachine or 3-bay or food prep sinks
		Filling glasses or water pitchers at a designated handwash sink
1		
		Waitstaff eating food off customer's plates Usersil placed on stored in a designated bandwach sink
		Utensil placed or stored in a designated handwash sink
		Drain (from equipment) dispensing into handwash sink
		Using handwashing sink for any other purpose other than handwashing
		Foodworker drinking from open cup
		Foodworker chewing gum

surfaces maintained, designed, constructed, installed, located Deteriorated enamel pans Food-contact equipment surfaces pitted, rusty, melted, cracked, chipped, broken (i.e., Pots, bowls, dishware, utensils) Cutting board cracked or deeply gouged, in poor repair Rusty shelving of reach-in refrigerator Foil or cardboard on shelves of reach-in or prep tables Garbage bag or other nonload grade plastic containers used for food storage (i.e. Chinese noodles, Mexican nacho chips, or ice) Towel or cloth covering food ##10 can reused for storing food or cooking Reuse of mollusk shells (one time use only if shucked on-site) Reuse of empited winefliquor bottles (narrow neck not cleanable) Reuse of empited winefliquor bottles (narrow neck not cleanable) Reuse of empited winefliquor bottles (narrow neck not cleanable) Use of wood other than hard maple (or other hard woods) for food-contact surface Metal shawings evident on can opener blade Rust in ice machine Crazing on chima Crazing on chima Crazing on chima Cracked food-grade plastic Excessive ice build-up in reach-in freezer Lubricant leaking from bearing of mixer Single use gloves reused Interior of reach-in refrigerator or freezer in poor condition Cloth safety glows used directly with food Reuse of single use plates (e.g. grease absorbent) Unprotected foods (bread, popcorn, etc.) in basket without a proper liner Garden hose used for water source (could be #11 depending on situation) Milk crate used to hold exposed foods (produce) A milk crate used to hold exposed foods (produce) Equipment not installed so as to facilitate cleaning Grouning broken at sink/wall juncture Cardboard or foil on shelves of walk-in Rusty or broken shelves in walk-in Poeteriorated exterior of chest freezer Pecling, chipped paint on sides of food equipment Walk-in refrigerator door does not close tightly Milk crates, sod a crates, bread crates used as shelves Wooden shelves used as closed in the refrigerator freezer Pecling, chipped paint on sides of food	16. 	under	kitchen
	pressure,	Hot water in public toilet facilities greater than 115°F
	provided as	Hot & cold water not under pressure
	required	 No hot/cold water in kitchen
		Self-closing water faucet at hand washing sink on for less than 15 seconds
31.	Sewage	 Unapproved subsurface sewage system
	disposal,	 Sewage backing up into food establishment
	approved	Sewage breaking out onto surface of ground
32.	Proper	Waste water dumped outside
	disposal of	 Condensate from walk-in discharged onto floor or to warewashing or food
	waste water	prep sinks
		 Drainage of water from soda gun, bain marie, or walk-in into bucket or sink
		(if sink is used for any purpose other than mop sink)
		 Accumulation of condensate in bottom of refrigerators
		Dirty mop bucket water not emptied
		 Drainage of water from condiment station draining via hose to bucket
		 Drain pipe from ice machine or walk-in goes through wall to the outdoors,
		drains onto driveway
33.	Plumbing:	Leaking pipes, faucets or hoses
	location,	Non-flushing or flooding/clogged toilet
	installation,	Sink drains backed up
	maintenance	Improperly installed interior grease trap
		Unclean interior grease traps
34.	No cross	 Note: An indirect connection of prep sink or 3 bay sink is NOT required by
	connections,	19-13-42. 2003 CT Plumbing Code required an air gap. Local DOH may
	back	require an indirect connection and does not need an ordinance.
	siphonage,	• Dishmachine direct connection (must be indirect to sewer line)
	backflow	 Water inlet not protected by backflow
		 Steam jacketed kettle has a submerged inlet
		• Ice machine (water-cooled) – does not have an air gap
		• Ice machine (air-cooled) – does not have an air break
		 Preflush hose (on dishmachine) - submerged (no air gap)
		 Carbonator- direct connection (No approved vented back-flow preventer)
		 Toilet tank – no anti-siphon device (on ball-cock)
		 Hoses attached outside building – no backflow preventer – needs hosebib
		vacuum breaker
		 Soda gun at bar – direct connection (no backflow preventer)
		• Attached hose at utility sink with NO shutoff downstream – an AVB is OK;
		does not require a hose bib vacuum breaker
		• Attached hose at utility sink with shutoff downstream; even if has AVB,
		requires hose bib vacuum breaker
		Soda gun lying in water Handle is the cost of th
		• <u>Hose on reel</u> – if shut-off is downstream, must have a pressure vacuum
		breaker device located 12 inches above the highest source of contamination
		• <u>Hose on reel</u> – if no shut-off, must be an atmospheric vacuum breaker 12
35.	Toilet facilities	inches above the reel Toilet facility not convenient or accessible
33.	adequate,	Toilet facility not convenient or accessible Employees not having access to convenient toilet facilities.
	accessible,	Employees not having access to convenient toilet facilities Public tailet facilities not in conformance with Public Code for accurant.
	designed,	Public toilet facilities not in conformance with Building Code for occupant load of establishment.
	installed	load of establishment
36.	Toilet rooms	Entry doors on toilet rooms not self-closing/tight-fitting/extending floor to
50.	enclosed with	Entry doors on tollet rooms not self-closing/tight-fitting/extending floor to ceiling
	self-closing	Note: Doors on bathrooms can only be propped open during cleaning
	doors	 Note: Doors on bainrooms can only be propped open auring cleaning A bathroom having louvered doors, unscreened doors
		A Daumoom naving louvered doors, unscreened doors
<u> </u>	<u>I</u>	

37.	Proper fixtures	Unclean urinal or toilet
	provided, good	Cracked urinal or toilet
	repair, clean	No toilet paper
		Uncovered waste basket in ladies's room for sanitary napkin disposal
38. *	Suitable hand	No hand soap
	cleaner &	 No disposable towels or clean section of cloth towel on dispenser
	sanitary towels	No waste receptacle at handwash sink or in close, convenient vicinity
	or approved	Inoperative soap dispenser, poor repair, unclean
	hand drying	Hand drying device not working, poor repair, unclean
	devices,	Unclean handwashing sink
	provided,	Unclean bar soap
	tissue waste	 Cracked handwash sink
	receptacle provided	
39.	Garbage:	Note: Do not debit if cardboard dumpster is uncovered unless it has food garbage inside.
37.	approved	Cardboard box used as garbage container
	containers,	Outdoor garbage containers/dumpster not covered
	adequate #,	Drain plug missing from dumpster
	covered, clean,	Insufficient number of garbage containers
L	rodent proof	Grossly unclean garbage cans or dumpster
40.	Storage areas	Garbage storage containers not on concrete slab or on a rack 12" off ground
	clean, properly	Debris around garbage cans/dumpster
	constructed	 Storage enclosure area around dumpster not constructed of easily cleanable,
		washable materials
41.	Garbage	 Indoor or outdoor garbage container overflowing
	disposed of in	 Garbage piled by back door
	an approved	 Cardboard boxes saved
	manner,	
	approved	
42.	frequency Presence of	Presence of mice, rats, cockroaches, flies
72.	insects, rodents	 Dead insects, mice, etc.
	msecus, rodenus	 Evidence of insect/rodent present (droppings)
43.	Outer	Unscreened vents (#16 mesh)
	openings	 Unscreened windows (#16 mesh)
	protected	 Doors open for ventilation
	against	Hole in exterior of building
	entrance of	Gap in bottom of door to outside
	insects, rodents	 Loading dock doors not a tight seal
44.	Floors; floor	Carpeted floor in kitchen, food prep. dishwashing, bathrooms
	covering	Missing floor tiles
	installed,	Unsealed concrete or rusted metal of walk-in floor
	clean, good	 Ice accumulation on walk-in freezer floor (also #32)
	repair	 Unclean floors
		 Wood floors (allowed in dry goods store room only)
		Littered floors, including walk-in
		 Tiled floors improperly grouted or in poor repair, deep recesses between tiles
45.	Floors graded,	 No drains in floors that are required to be water flushed for cleaning or
	drained	receive the discharge of condensate or waste water
		Unclean floor drain
		Missing grate on floor drain
		Floors not graded to drain – therefore standing water in floor drain
46.	Floor, wall	Tile broken at floor/wall juncture
	juncture	 No coving where needed (all junctures closed <1/32")
47.	Mats	Cardboard on walk-in or kitchen floor
	removable,	• Unclean mats
	good repair,	Wooden slats, duck boards (not sealed, not removable)
	clean	Broken/torn mats

48.	Exterior	Outdoor dining area littered
70.	walking,	 Outdoor eating areas not properly drained
	driving	 Outdoor dining tables located on lawn grass
	surfaces, good	
	repair, clean	 Walking surfaces in eating areas not surfaced to facilitate cleanliness and minimize dust
49.	Walls, ceilings,	
47.	attached	 Unclean walls, including walk-in and attached evaporator fan Cracked walls, holes in walls
	equipment,	,
	properly	Paint peeling from walls/ceiling Foregoid as from a tride injects in fined areas as a constant and a second as from a tride injects in fined areas as a constant as
	constructed,	Exposed rafters, studs, joists in food prep or warewashing area
	good repair,	Missing ceiling tiles Health of the second of the se
	clean.	Unclean light fixtures
		Absorbent, non-washable material behind sinks, dishwashing machine,
		cooking equipmentStained ceiling tiles
50.	Dustless	Ice accumulation on wall of walk-in freezer I.
30.		Use of corn broom to sweep large sections of floor Grant Control of the con
	cleaning method,	Storage of cleaning equipment in kitchen
	cleaning	• Storing mops in mop water
	equipment	Storing mops on floor
	properly	Broom stored on floor
	stored	
51.	Lighting	Lighting inadequate in walk-in freezer or refrigerator requiring use of
	adequate	flashlight
	_	Light bulbs not working causing insufficient light
52.	Ventilation: no	Odor in toilet facility due to inadequate ventilation
	steam, odors	Kitchen smoky, excessive steam from steam tables
		Excessive kitchen odors
		 Moldy/musty smelling basement due to humidity
53.	Hoods & ducts	Bathrooms not vented
	vented as	Fryolator or range not ventilated
	required	 Design of cooking exhaust hood causing grease to condense and drip back
		onto food or food contact surfaces; must be 6" beyond cooking surface (refer
		to fire marshal)
		 Grease screens missing
		 Lack of fire suppression systems
54.	Dressing	 Dressing rooms – not clean, orderly, providing potential vermin harborage
	rooms &	 Facilities not provided for employee's belongings to facilitate such belongings
	lockers	being kept separate from foodservice areas
	adequate,	
	clean	
55.	Establishment	General clutter
	& premises	Employee clothes/articles stored in food prep area. May be in dry good
	free of litter,	storage areas if not affecting food protection
	no insect/rodent	Storage of articles not related to food production
	harborage, no	Storage of discarded equipment, debris, litter, decorations-disorderly
	unnecessary	Fly swatter stored improperly in food service or dispensing area
	articles	Storage of broken equipment providing potential vermin harborage
	32 2220	• Unnecessary articles
<i></i>		Storage of leftover construction debris
56.	Complete	Laundry facility in food prep or warewashing areas
	separation of	Establishment operations conducted in any room used for living or sleeping
	living/sleeping	(i.e. employee break room)
	quarters &	
	laundry	

57.	Clean/soiled	 Soiled linens, towels, sponges, tablecloths stored on floor
	linens stored	 Soiled linens, towels, sponges, tablecloths scattered throughout kitchen
	properly	 Clean linen stored on floor or where can be contaminated
		 Absorbent containers (cardboard boxes) used for unclean laundry
58.	No live birds,	 Cats, dogs, birds or other pets in food prep, storage, service areas, or
	turtles or other	transportation vehicles
	animals	 No live animals except for permitted assistance dogs
59.	Smoking	 No non-smoking signs posted at all public entrances
	signage	
60. *	Qualified Food	There is no QFO certificate or QFO signed statement maintained on site and
	Operator	available for review
		The QFO is not full-time and in a supervisory capacity
		 There is no QFO as required for Class III and IV establishments
		• The QFO certificate on premises is not from one of the testing organizations
		approved by DPH FPP
61. *	Designated	• There is no Designated Alternate in writing (signed statement) maintained on
	Alternate	site and available for review
62. *	Written	No written (or acceptable electronic) documentation of training program on
	documentation	site
	of training	 No written (or acceptable electronic) training records for individual
	program	employees on site
