

Food Grade Bleach

Requirements

- Must indicate for use on food contact surfaces
- Must contain EPA Registration number
- Unscented
- Must be allowed to air dry (not rinse)

- ◆ Food contact surfaces may be listed directly on the label or it may list some of the following: sinks, plates, glassware, cutting boards, baby bottles, etc.
- ◆ Food grade bleach can be found at many places including your local supermarkets, home improvement stores, and drug stores.
- ◆ Below are 4 specific products found to be food grade and approved for use in licensed food service establishments, temporary events, and food vendors in compliance with the CT Public Health Code.
- ◆ Some bottles, like the Nice!, Great Value and White Cloud indicate that product is not for use on silverware.
 - ◆ DPH Food Protection Program has determined that said products may tarnish silver metals, but are safe and effective for ware washing and sanitizing.
