# 2018 Youth Survey Report Groton, Connecticut 

Report prepared by:<br>Archie C. Swindell, PhD, Quantitative Services<br>June 6, 2018

## Acknowledgements

This biennial youth survey is sponsored by the Groton Alliance for Substance-Abuse Prevention (GASP), under the supervision Carolyn Wilson, Health Program Coordinator, Ledge Light Health District. It was administered from February 12 to March 12, 2018. The 2018 survey was given to students at Fitch High School, Cutler Middle School, West Side Middle School, and to Groton students attending Ella Grasso Technical High School. A few students attending the Marine Science Magnet High School took the survey, but not enough for separate tabulations. GASP consists of over 20 local groups and agencies which are engaged in prevention activities or which offer constructive activities for youth. GASP has been active for 18 years in Groton. This youth survey is part of a continuing series of grant-funded prevention programs.

The 2018 survey was the same as surveys given in 2012, 2014 and 2016, except for updates to a few questions. All GASP surveys are derived from the Connecticut Governor's Prevention Initiative for Youth (GPIY) survey [1]. The GPIY survey has been given in Groton since 2000 9 surveys in 19 years.

The author sincerely appreciates the cooperation of the superintendent, administration and teachers of the Groton Public Schools, who approved the survey and assisted - along with GASP volunteers - in supervising the administration of it. Special thanks go to the youths who shared their personal experiences and opinions, and to their parents who permitted them to take the survey. It is emphasized that all results of the survey are anonymous, and are reflective of the entire community, not primarily its schools.

The structure of this report is similar to previous survey reports, to facilitate comparisons with results of past Groton surveys, as well as results from the Monitoring The Future (MTF) national survey [2].

## SUMMARY RESULTS

Two principal purposes of surveys like this are (1) to measure progress in reducing substance abuse, both prevalence of use and predisposing traits; and (2) explore correlations between substance use and personal characteristics, to improve prevention programs by identifying highrisk youth. To ensure statistical validity, the sample of students is as large as practical and is random; respondents are assured of anonymity because of the sensitivity of questions.

## Demography

The Groton youth surveyed in both 2016 and 2018 were enrolled in the district's two middle schools (Carl Cutler and West Side; grades 7-8), high school students (grades 9-12) in Fitch Senior High School, and Groton-resident youth attending Ella Grasso Technical High School and the Marine Science Regional Magnet High School (Table 5). A total of 1,326 youth responded to the survey, and 173 (13\%) were excluded from tabulations and analyses because of quality-control criteria (Table 1). Median times required to complete the survey were 15.2 (12.3 to 19.0) minutes (high school) and 17.7 (14.3 to 22.1) minutes (middle schools).

The survey sample contained 68 more boys than girls. (Table 1). The racial/ethnic composition of the sample closely reflected that of the district population [5] (Table 2). Two-thirds of the respondents had attended school in Groton for more than 5 years (Table 3). About half (47\%) are from lower income families, eligible for free or reduced lunch (Table 4). These demographics are about the same as in 2014 and 2016.

High school students who used a personal device (smart phone or tablet) to access the survey were compared to students who used a school computer. There were no significant differences between the two groups for key variables, including recent or lifetime use of alcohol, marijuana or other substances, so no surveys were excluded from analysis for these reasons. The use of a personal device is acceptable as long as there is supervision while the survey is being taken.

## Substance Use

The progressive decrease in the use of alcohol among Groton youth seen for several years has stabilized in the past two years, so that prevalence in 2018 is less than $30 \%$ of prevalence in 2010 (Tables 40-42). Some tables contain data from specified schools, to allow historical comparisons. Tables unlabeled with schools refer to all respondents not otherwise excluded.

Graphical displays of levels of 30-day use of alcohol between 2000 and 2018 reveal a remarkable pattern. Among high school youth in grades 9-10, decreased use between 2000 and 2012 followed the national pattern (Figure 1), and may be ascribed to a general trend among American youth. The slopes of linear regressions of prevalence from 2000 to 2012 were nearly identical in the U.S and in Groton: decreases of 1 to 1.5 percentage points per year. After 2012, however, decreases in Groton far surpassed national averages. It is reasonable to interpret this pattern as the result of intensive prevention efforts of GASP and its coordination of messaging and provision of constructive alternative activities. A nearly identical pattern occurred among $8^{\text {th }}-$ graders (Figure 2), even though the curve is bumpier due to smaller numbers of survey respondents. The sharp decrease among $8^{\text {th }}$-graders began two years earlier, in 2010; this behavior apparently carried forward as youth entered high school. The fact that these changes in
use occurred in several grades, and remained low for at least 3 surveys, makes this pattern highly credible, not a statistical anomaly.

While alcohol use was decreasing from 2010 to 2018, marijuana use also decreased, beginning also in 2012, reaching single-digits by 2018. Even 30-day use in grades 11-12 was under 13\% (Table 6). These decreases are consistent with the marked decreases in disapproval of marijuana use by both parents in friends (Table A) - again as part of prevention efforts by GASP.

Table A. Perceived approval of marijuana use

| Measure | Perception of approval |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 8}$ |
|  |  |  |  |  |  |
| Perception of "No Disapproval At All" by: |  |  |  |  |
| Parents | 65.6 | 25.5 | 17.3 | 5.1 |
| Friends | 40.7 | 80.2 | 63.8 | 22.9 |

Figure 1.

Figure 2.

Table B. Heavier use of substances in past 30 days Grades 9-12, Fitch High School

| Substance | Use | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 8}$ |
| :--- | :--- | :---: | :---: | :---: | :---: |
|  |  | $\%$ | $\%$ | $\%$ | $\%$ |
| Alcohol | 5 or more days in past 30 days | 4.9 | 6.0 | 4.6 | 2.8 |
| Alcohol | 5 or more drinks at least once | 17.9 | 12.3 | 9.2 | 1.7 |
| Marijuana | 5 or more days in past 30 days | 11.1 | 8.2 | 4.9 | -- |
| Cigarettes | 5 or more days in past 30 days | 5.1 | 3.5 | 1.2 | 0.8 |
| E-Cigarettes | 5 or more days in past 30 days | no data | 1.1 | 1.9 | 4.6 |
| Energy drinks | 5 or more days in past 30 days | 9.1 | 7.8 | 4.5 | 3.6 |
| En. drinks + alcohol | 5 or more days in past 30 days | 4.2 | 3.5 | 0.9 | 0.7 |

30-Day use means any use at all in the past 30 days. Heavier or more chronic use is tabulated for the past four surveys for Fitch High School students. The 30-day use of substances has been trending down (Figures 1, 2), and heavier use continues to show similar downward trends for all except e-cigarettes (Table B),

Cigarette smoking has almost disappeared among youth (Figures 1, 2), probably due to intensive public service anti-smoking campaigns and withdrawal programs, and exorbitant tax-driven cost of cigarettes. There has been a steady decline for the past 19 years, with the sharpest drop among $8^{\text {th }}$-graders between 2000 and 2004. The success of the anti-smoking message gives hope for future anti-marijuana campaigns, should this substance be legalized for generation of tax revenue. A cautionary note: recent use of e-cigarettes (vaping, which can also apply to cannabinoids) has increased, and is now 4-times as prevalent as regular tobacco cigarettes (Table 6).

Groton-resident youth at Grasso Technical High School were surveyed in 2016 and 2018. The 30-day use of alcohol, cigarettes and marijuana all decreased (Table C, Table 11). Grasso 12 ${ }^{\text {th }}$ graders were not included in the 2018 survey, and too few Marine Science Magnet HS students were surveyed in 2018 (Table 5).

Table C. Prevalence of 30-day use, Grasso Tech grades 9-11

| Substance | Prevalence of 30-day use |  |
| :--- | :---: | :---: |
|  | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 8}$ |
|  | $\%$ | $\%$ |
| Alcohol | 14.0 | 2.0 |
| Cigarettes | 8.8 | 0.0 |
| Marijuana | 8.8 | 6.7 |

## Personal Characteristics

Associations of substance use have been noted for several surveys in Groton, in which the use of one substance is associated with the use of others. Similar relationships exist in the 2018 survey (Table 10). Therefore, alcohol is a reasonable surrogate for substances in general, in the Correlation section (Tables 46-55). 30-Day users of alcohol are contrasted with non-users, to help identify youth at risk of abusing substances (not only alcohol). The tables record the statistical significance in comparing the two groups and ratios of scores of Users / Non-Users. This analysis is conducted only for high school students, grades 9-12.

Alcohol users indicate that influence of friends, and influence and support of parents, are important in preventing drinking (Tables 46, 47). Users of alcohol are consistently more lenient toward antisocial actions than non-users (Table 48), and are more likely to engage in antisocial activities themselves (Table 52). Users spend more time hanging out with friends (Table 49). Self-concept and personal feelings of users are not significantly different from non-users (Tables 50, 53). Family influence is important in drinking behavior. Drinkers report less parental monitoring of their activities (Table 51), and more time left alone after school without adults (Table 54). Parental drinking also appears to encourage youth drinking (Table 54). Finally, there is a connection between increased gambling and increased drinking (Table 55).

Recreational use of opioid pain meds is of great concern both nationally and regionally because of the lethal nature of addiction and overdose. It is critical to prevention efforts to identify the pathway(s) by which recreational use begins. There is much publicity about overuse of opiate pain meds, and the culpability of drug companies and some doctors. However, the actual
pathway(s) by which opioid problems begin has received scant attention. Overuse of opiates prescribed by medical authority is one pathway. But they may also begin with recreational use of less dangerous drugs like marijuana, progressing to opioids in search of a higher high. To try to shed light on this question, an item was included in the survey about medical use of opiates (Table 8A). The idea was that, if most recreational opioid users had never been prescribed pain meds, introduction through a recreational pathway may be important.

It was found that, of youth who had experimented with opioids in their lifetimes, $71 \%$ had previously been prescribed an opiate for pain. Only $30 \%$ of recreational opioid users were lifetime marijuana users. Of course, experimenting with opioids in high school is a long way from addiction or death, so these results are merely suggestive. But from these data, prescribed medical use appears to be the more common gateway. The gateway question can best be answered by interviewing recovering opioid users, rather than through surveys.

Table D. Trends in Estimated vs. Actual Use - Fitch HS, Grades 9-12

| Substance |  | Prevalence of Use |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Survey <br> Year | Estimated <br> (median) | Actual <br> Reported | Ratio <br> Est./Actual |
|  |  | $\%$ | $\%$ | $\%$ |
|  | 2018 | 25.1 | 12.0 | 209 |
|  | 2016 | 19.5 | 13.5 | 144 |
|  | 2014 | 30.5 | 17.4 | 175 |
|  | 2012 | 37.6 | 30.4 | 124 |
| Marijuana | 2018 | 34.2 | 9.5 | 360 |
|  | 2016 | 23.5 | 10.1 | 233 |
|  | 2014 | 37.3 | 14.6 | 255 |
|  | 2012 | 43.8 | 32.5 | 135 |
|  | 2018 | 8.5 | 1.2 | 710 |
|  | 2016 | 6.8 | 1.9 | 358 |
|  | 2014 | 12.1 | 7.4 | 164 |
|  | 2012 | 11.3 | 7.3 | 155 |

Survey respondents are asked to estimate about how many of their peers currently use substances, and median estimates are calculated (Table 26). Medians are the prevalence of use estimated by one-half of respondents. Estimated use is compared with actual use reported by the same youth, for four survey years (Table D). Although these two prevalence measures are not strictly comparable, trends are of interest. In 2018 especially, youth have overestimated the use by peers of all three substances. One has to wonder if youth are under-reporting their own use, and their median estimates are not closer to the truth.

Almost all youth think it is at least somewhat wrong to bully someone by teasing or taunting. Nevertheless, almost one-quarter of middle school youth report having been bullied at school in the past year. Electronic bullying is nearly as common as physical bullying. Both are more common among girls than boys (Table 29). Of the youth who were bullied in school, $53 \%$ were also e-bullied. Of those who were not bullied in school, only $5.3 \%$ were e-bullied.

## METHODS

This youth survey was administered to Groton public school students in grades 7-12, February 12 to March 12, 2018. The survey was originally developed as the Connecticut Governor's Prevention Initiative for Youth (GPIY) youth survey for $6^{\text {th }}-12^{\text {th }}$ Grade. Beginning in 2006, the Groton survey has been administered by computer on the SurveyMonkey.com® web site to grades $7-10$ or $7-12$, under the supervision of school personnel and LLHD. It has been adapted to the computer and modified by decreasing its length and updating the core measures questions to comply with federal guidelines. Questions have been added to explore bullying and gambling and correlations between mental health and substance use. Text of mental health questions is taken from national surveys. Language of most questions is retained from previous Groton surveys.

Due to a problem with survey software, some of the details of marijuana use were not recorded (Table 6). Values which are recorded are valid, however.

As has been past practice, parents could excuse their children from participating, and youth could decline the survey by simply logging off the computer. To assure a random sample, classes in school subjects which are required of all students were randomly chosen and asked to take the survey. Since 2014, some students have accessed the survey on personal devices (smart phones or tablets). These entries are screened for spurious or prankish entries; none were found. Surveys were excluded from tabulation and analysis if they failed quality control criteria. Some students apparently mis-reported their grade (Table 5), but were not excluded.

Conversation among students during the survey is discouraged. Participants are reassured about the anonymity of their responses, and the need for their honest input. All analysis and reporting is carried out using Statistica $64{ }^{\circledR}$ version 10 (StatSoft, Tulsa, OK), Microsoft Excel® 2010, Microsoft Word ${ }^{\circledR}$ 2010, and Adobe Acrobat ${ }^{\circledR}$ XI Pro. All software is licensed to Quantitative Services.

Participation has been excellent since 2014. Numbers have ranged from nearly $50 \%$ to almost $80 \%$ of enrollment per grade. Sampling variances range from $\pm 1.5 \%$ to $\pm 3.5 \%$. In all tables except Demography, results were weighted so that each grade contributed equally, regardless of numbers of participants. Weights are shown in Table 1.

Statistical significances of differences between groups in the Correlations section (30-day Users vs. Non-Users of alcohol) were calculated by the non-parametric Wilcoxon method. Calculations in this section are limited to grades 9-12, because of the low use of alcohol by middle school youth. P-values are computed for the correlation between drinking alcohol (YES vs. NO) for each trait. A p -value is defined as the probability that the observed difference is due to chance alone; a low value ( $\mathrm{p}<0.01$ ) indicates high probability that the difference is due to a genuine relationship between the trait and alcohol consumption, not to random chance. In the survey, scores which are on 2 to 6 point Likert scales are converted to a 0-100 scale for averaging. For example, for a 4 -point scale question, 1 is converted to 0,2 is converted to 33,3 to 67 , and 4 to 100 ; the scale score is the average of the latter values. Ratios of scores provide a measure of the degree of the correlation. Scales are inverted if necessary, due to the language of the question, so that all are in increasing "favorability" of the factor, as explained in footnotes to the tables.

Respondents were asked to estimate the percentage of their classmates who regularly use alcohol, cigarettes, or marijuana. A series of seven percent-intervals ("bins") were provided in the survey. In order to compare respondents’ estimates of usage ("social norms") with actual reported usage, medians (level estimated by $50 \%$ of respondents) were estimated by linear interpolation.

Table 28. Gambling activity

| Substance | Grade |  |  |  |  |  | All | Gender |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 7 | 8 | 9 | 10 | 11 | 12 |  | Female | Male |
|  | \% | \% | \% | \% | \% | \% | \% | \% | \% |

Gambling is risking money or something of value on an activity with uncertain outcome. This can include bingo, scratch tickets, lottery, raffles, on-line bets, sports bets, casino gambling, or card games like poker. How often do you gamble for money or possessions?

| Never | 84.0 | 82.2 | 88.9 | 84.1 | 85.9 | 91.1 | 85.4 | 91.2 | 80.0 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Daily | 1.4 | 0.7 | 1.1 | 1.6 | 1.2 | 0.8 | 1.1 | 0.9 | 1.2 |
| Weekly | 0.0 | 0.4 | 1.1 | 2.7 | 0.6 | 1.6 | 1.0 | 0.9 | 1.1 |
| Monthly | 3.3 | 3.0 | 2.8 | 2.2 | 3.1 | 3.2 | 2.9 | 2.0 | 3.9 |
| Less than monthly | 11.3 | 13.7 | 6.1 | 9.3 | 9.2 | 3.2 | 9.5 | 5.0 | 13.8 |
| Has anyone in your family (like a parent or sibling, not you) ever gambled so that it <br> created problems at home, at work, or with friends <br> No <br> Yes$\quad 95.3$ | 95.1 | 93.9 | 95.0 | 93.2 | 91.9 | 94.3 | 93.5 | 95.2 |  |
| $\quad$ | 4.7 | 4.9 | 6.1 | 5.0 | 6.8 | 8.1 | 5.7 | 6.5 | 4.8 |

Table 29. Bullying

| Substance | Grade |  |  |  |  |  | All | Gender |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 7 | 8 | 9 | 10 | 11 | 12 |  | Female | Male |
|  | \% | \% | \% | \% | \% | \% | \% | \% | \% |
| Bullying is when 1 or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again. It is not bullying when two students of about the same strength or power argue or fight or tease each other in a friendly way. <br> During the past 12 months, have you been bullied on school property? |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
| No | 73.1 | 77.0 | 78.3 | 83.0 | 84.7 | 87.8 | 79.7 | 77.2 | 82.4 |
| Yes | 26.9 | 23.0 | 21.7 | 17.0 | 15.3 | 12.2 | 20.3 | 22.8 | 17.6 |
| During the past 12 months, have you ever been electronically bullied? (Count being bullied through texting, Instagram, Facebook, or other social media.) |  |  |  |  |  |  |  |  |  |
| No | 79.3 | 80.7 | 86.1 | 83.0 | 85.3 | 89.5 | 83.3 | 79.3 | 87.2 |
| Yes | 20.7 | 19.3 | 13.9 | 17.0 | 14.7 | 10.5 | 16.7 | 20.7 | 12.8 |

## Section 4. Family \& Community Domain

Table 30. Family attitudes toward alcohol, tobacco, and marijuana

| Question / Response | Grade |  |  |  |  |  | All | Gender |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 7 | 8 | 9 | 10 | 11 | 12 |  | Female | Male |
|  | \% | \% | \% | \% | \% | \% | \% | \% | \% |
| How wrong do your parents/guardians feel it would be for you to: Smoke tobacco? |  |  |  |  |  |  |  |  |  |

Section 5. School Domain

Table 37. School performance

| Question / Response | Grade |  |  |  |  |  | All | Gender |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 7 | 8 | 9 | 10 | 11 | 12 |  | Female | Male |
|  | \% | \% | \% | \% | \% | \% | \% | \% | \% |
| What kinds of grades do you usually get? |  |  |  |  |  |  |  |  |  |
| Mostly A's | 19.7 | 24.0 | 35.1 | 19.3 | 20.1 | 17.7 | 22.7 | 27.4 | 18.2 |
| A's and B's | 44.6 | 44.0 | 29.2 | 31.6 | 30.8 | 41.1 | 36.9 | 41.3 | 32.5 |
| Mostly B's | 17.8 | 14.2 | 14.6 | 20.9 | 27.8 | 18.5 | 19.0 | 14.5 | 23.3 |
| B's and C's | 11.7 | 9.5 | 9.7 | 12.8 | 9.5 | 16.9 | 11.7 | 10.8 | 12.4 |
| Mostly C's | 4.7 | 5.1 | 5.4 | 9.6 | 5.9 | 1.6 | 5.4 | 3.9 | 6.9 |
| C's and D's | 0.9 | 2.2 | 4.9 | 4.8 | 5.3 | 4.0 | 3.7 | 1.2 | 6.2 |
| Mostly D's | 0.0 | 0.4 | 1.1 | 0.5 | 0.6 | 0.0 | 0.4 | 0.4 | 0.5 |
| D's and F's | 0.5 | 0.4 | 0.0 | 0.5 | 0.0 | 0.0 | 0.2 | 0.5 | 0.0 |
| Mostly F's | 0.0 | 0.4 | 0.0 | 0.0 | 0.0 | 0.0 | 0.1 | 0.1 | 0.0 |

Table 38. Suicide prevention

| Question / Response | Grade |  |  |  |  |  | All | Gender |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 7 | 8 | 9 | 10 | 11 | 12 |  | Female | Male |
|  | \% | \% | \% | \% | \% | \% | \% | \% | \% |
| Have you ever received suicide-prevention training? |  |  |  |  |  |  |  |  |  |
| No, never | 92.0 | 93.5 | 91.5 | 89.5 | 88.1 | 92.5 | 91.2 | 90.3 | 92.0 |
| Yes, >1 year ago | 3.8 | 2.3 | 5.1 | 7.2 | 8.2 | 5.0 | 5.2 | 5.4 | 5.0 |
| Yes, in the past year | 4.2 | 4.2 | 3.4 | 3.3 | 3.8 | 2.5 | 3.6 | 4.3 | 3.0 |
| I feel prepared to refer a friend who expresses suicidal thoughts to an adult who can help. |  |  |  |  |  |  |  |  |  |
| Yes | 66.0 | 69.0 | 71.4 | 74.3 | 75.9 | 73.1 | 71.6 | 73.5 | 69.8 |
| No | 34.0 | 31.0 | 28.6 | 25.7 | 24.1 | 26.9 | 28.4 | 26.5 | 30.2 |

Table 39. Commitment to school

| Question / Response | Grade |  |  |  |  |  | All | Gender |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 7 | 8 | 9 | 10 | 11 | 12 |  | Female | Male |
|  | \% | \% | \% | \% | \% | \% | \% | \% | \% |
| I try hard to do good work at school. |  |  |  |  |  |  |  |  |  |
| Definitely not true | 2.3 | 1.4 | 1.6 | 3.2 | 0.6 | 2.4 | 1.9 | 1.1 | 2.3 |
| Mostly not true | 4.7 | 2.9 | 6.0 | 6.3 | 5.9 | 7.2 | 5.5 | 3.2 | 7.6 |

## Section 6. Correlations - 30-Day Drinkers vs. Non-Drinkers

Tables in this section compare respondents in grades 9-12 who reported drinking alcoholic beverages within the past 30 days (Drinkers) with those who reported they did not (Non-Drinkers). Mean scores reported in each table are derived from the same data used to generate the tables in previous sections of this report. Mean scores are ascending intensity scales, as explained in footnotes. The rescaling calculation and determination of statistical significance are explained in Methods.

Statistical significances indicated are: n.s. $=$ no significant difference ( $\mathrm{p}>0.05$ ), $0.05=[\mathrm{p}=0.01$ to $0.05], \mathbf{0 . 0 1}=[\mathrm{p}=0.001$ to 0.01$], \mathbf{0 . 0 0 1}=[\mathrm{p}<0.001$ to 0.001$],<\mathbf{0 . 0 0 1}=[\mathrm{p}<0.001]$. Statistical significance is discussed in Methods. When $\mathrm{p} \geq 0.05$, there is no significant difference between NO and YES groups, and the mean of the YES group is equal to to the NO group, within measurement error, so only NO is reported. Data for all Groton youth, including Grasso and Marine Science High Schools, are reported together.

Table 46. Prevention strategies

| Question and response choices | Statistical Significance | Scale Score, <br> Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER | USER/NON |
|  | p-value | \% of max | \% of max | \% |
| How important do you think the following are in preventing kids from drinking? |  |  |  |  |
| High price | n.s. | 63.3 | 68.2 | 108 |
| Checking ID's in stores and bars | 0.01 | 29.6 | 45.4 | 153 |
| Friends who don't drink | 0.001 | 50.0 | 68.0 | 136 |
| Parental strictness about drinking | 0.001 | 49.6 | 69.1 | 139 |
| Driver's license restriction | n.s. | 47.3 | 58.8 | 124 |
| Alcohol education in school | 0.01 | 63.2 | 79.2 | 125 |
| Blood alcohol or breathalyzer tests | 0.001 | 51.5 | 65.4 | 127 |

Statistical significance: $p$-value $>0.01=n . s$. (see Methods for further explanation).

* Mean scores are based on the 3-point scale of Table 36, rescaled to 0-100.

Higher score indicates a perception of MORE EFFECTIVE prevention.

Table 47. Social supports

| Question and response choices | Statistical <br> Significance | Scale Score, Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NONUSER | USER/NON |
|  | $p$-value | \% of max | \% of max | \% |
| When you have a problem that bothers you, how often do you talk about it with: |  |  |  |  |
| Parents or guardians | <0.001 | 41.7 | 28.0 | 67 |
| A teacher | n.s. | 15.0 | 10.8 | 72 |
| A friend | n.s. | 58.0 | 56.7 | 98 |
| Nobody. I keep it to myself. | n.s. | 59.3 | 59.6 | 101 |

* Mean scores are based on the 4-point scale of Table 20, rescaled to 0-100.

Higher score means GREATER likelihood of talking with person(s) indicated.

Table 48. Attitudes toward antisocial behavior

| Question and response choices | Statistical <br> Significance | Scale Score, <br> Recent Alcohol Consumption |  | USER/NON |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER |  |
|  | $p$-value | \% of max | \% of max | \% |
| How wrong do you think it is for someone your age to: |  |  |  |  |
| Taunt someone to hurt their feelings | <0.001 | 84.4 | 64.8 | 77 |
| Cheat on a test at school | <0.001 | 60.0 | 32.6 | 54 |
| Drink alcoholic beverages | <0.001 | 73.9 | 25.8 | 35 |
| Smoke cigarettes | <0.001 | 86.4 | 68.1 | 79 |
| Use marijuana | <0.001 | 69.1 | 27.3 | 39 |
| Pick a fight with someone (not family) | <0.001 | 72.9 | 51.5 | 71 |
| Place bets on-line | <0.001 | 67.5 | 38.9 | 58 |
| Drink and drive | 0.001 | 94.0 | 85.4 | 91 |
| Purposely damage property that does not belong to them | <0.001 | 90.6 | 74.0 | 82 |
| Attack someone to hurt them | <0.001 | 90.2 | 70.1 | 78 |
| Ride with driver under influence of alcohol or drugs | <0.001 | 89.6 | 71.0 | 79 |

* Mean scores are based on the 4-point scale of Table 22, rescaled to 0-100.

Higher score means the act was considered MORE WRONG by the average respondent.

Table 49. Time spent after school

|  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Question and response choices |  | Scale Score, <br> Recent Alcohol Consumption |  |  |
|  | Significance | USER | NON-USER | USER/NON |
| How many hours a week do you usually spend: | p-value | $\%$ of max | $\%$ of max | $\%$ |
| Watching TV |  |  |  |  |
| Reading books, magazines or newspapers | n.s. | 40.0 | 43.1 | 108 |
| Hanging out with friends in private homes | 0.01 | 23.2 | 16.7 | 72 |
| Doing volunteer work | $<0.001$ | 37.0 | 56.3 | 152 |
| Attending religious services | n.s. | 14.6 | 11.5 | 79 |
| Using a computer unrelated to school | n.s. | 11.3 | 8.5 | 75 |
| Listening to music | n.s. | 54.4 | 52.4 | 96 |

* Mean scores are based on the 4-point scale of Table 23, rescaled to 0-100. Higher score means MORE TIME spent in the activity by average respondent.

Table 50. Self concept

| Question and response choices | Statistical <br> Significance | Scale Score, <br> Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER | USER/NON |
|  | $p$-value | \% of max | \% of max | \% |
| How much do you disagree or agree with the following: |  |  |  |  |
| I feel lonely. | n.s. | 30.3 | 28.3 | 93 |
| I am good at making decisions. | n.s. | 68.2 | 68.8 | 101 |
| I feel sad most of the time. | n.s. | 28.7 | 27.5 | 96 |
| I have so much energy, I don't know what to do with it. | n.s. | 37.1 | 43.9 | 118 |
| I have a number of good qualities. | n.s. | 70.0 | 75.0 | 107 |
| I have trouble concentrating. | n.s. | 50.8 | 54.7 | 108 |
| I have less energy than I think I should. | n.s. | 39.4 | 40.5 | 103 |
| I would stick up for someone being bullied. | n.s. | 74.7 | 76.6 | 103 |
| I have many good qualities. | n.s. | 73.9 | 74.4 | 101 |

* Mean scores are based on the 4-point scale of Table 25, rescaled to 0-100.

Higher score means STRONGER AGREEMENT by average respondent.

Table 51. Relationships with parents

| Question and response choices | Statistical Significance | Scale Score, <br> Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER | USER/NON |
| How true are the following statements? | p-value | \% of max | \% of max | \% |
| When I am away from home, my parents know where. | <0.001 | 84.2 | 65.5 | 78 |
| I share thoughts, feelings with my parents. | 0.01 | 55.8 | 47.7 | 85 |
| My parents participate in my school activities. | n.s. | 44.2 | 40.4 | 91 |
| I feel very close to my parents. | n.s. | 76.8 | 74.1 | 96 |
| I feel loved and valued by my family. | n.s. | 85.1 | 84.6 | 99 |
| If I break a family rule, I am disciplined. | n.s. | 71.7 | 65.5 | 91 |

* Mean scores are based on the 3-point scale of Table 32, rescaled to 0-100.

Higher score means MORE LIKELY to be true.

Table 52. Antisocial activities

| Question and response choices | Statistical Significance | Scale Score, <br> Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER | USER/NON |
|  | $p$-value | \% of max | \% of max | \% |
| In the past year, did you: |  |  |  |  |
| Steal something worth \$100 or less? | <0.001 | 11.0 | 36.7 | 333 |
| Cheat on a test at school? | <0.001 | 34.4 | 76.7 | 223 |
| Sell illegal drugs? | <0.001 | 0.7 | 12.4 | 1876 |
| Bring a knife, gun or other weapon to school? | n.s. | 1.3 | 4.8 | 384 |
| Pick a fight with someone, not a family member? | <0.001 | 14.3 | 33.8 | 237 |
| Say or do something to deliberately hurt their feelings? | 0.001 | 25.1 | 44.2 | 176 |
| Ride as passenger with driver under influence of drugs/alcohol? | <0.001 | 6.9 | 35.7 | 515 |

* Mean scores are based on the 3-point scale of Table 21, rescaled to 0-100.

Higher score means MORE INFRACTIONS by average respondent.

Table 53. Personal feelings

| Question and response choices | Statistical <br> Significance | Scale Score, <br> Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER | USER/NON |
|  | $p$-value | \% of max | \% of max | \% |
| During the past 30 days, about how often did you feel: |  |  |  |  |
| Nervous? | n.s. | 43.8 | 42.5 | 97 |
| Hopeless? | n.s. | 19.8 | 22.7 | 114 |
| Restless or fidgety? | n.s. | 37.2 | 45.7 | 123 |
| So depressed that nothing could cheer you up? | n.s. | 16.5 | 20.0 | 121 |
| Angry with someone or something? | n.s. | 37.3 | 44.8 | 120 |
| Worthless? | n.s. | 17.4 | 23.3 | 134 |

Mean scores are based on the 4-point scale of Table 27, rescaled to 0-100.
Higher score means MORE OFTEN felt by average respondent.

Table 54. Personal characteristics

| Question and response choices | Statistical Significance | Scale Score, <br> Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER | USER/NON |
|  | p-value | \% of max | \% of max | \% |
| Eligibility for free/reduced lunch | 0.01 | 61.5 | 40.3 | 65 |
| How long in Groton schools | n.s. | 80.4 | 86.8 | 108 |
| Poor grades | n.s. | 64.7 | 71.9 | 111 |
| Time after school without adults | <0.001 | 50.1 | 66.3 | 132 |
| Parent(s) drink | <0.001 | 61.1 | 85.3 | 140 |
| Family problems with alcohol | <0.001 | 18.4 | 39.6 | 216 |
| Try hard in school | <0.001 | 79.8 | 67.6 | 85 |
| Feel safe at school | n.s. | 62.3 | 58.9 | 95 |
| A best friend at school | n.s. | 76.9 | 84.5 | 110 |
| Encouraged to do best at school | n.s. | 70.3 | 64.3 | 91 |

Mean scores are based on various tables, rescaled to 0-100.
Higher score means MORE LIKELY to be true for by average respondent.

Table 55. Gambling, Bullying

| Question and response choices | Statistical Significance | Scale Score, <br> Recent Alcohol Consumption |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | USER | NON-USER | USER/NON |
|  | p-value | \% of max | \% of max | \% |
| How often do you gamble? | 0.001 | 8.8 | 20.6 | 236 |
| Any problem gambling in family? | n.s. | 6.0 | 10.3 | 171 |
| Bullied on school property? | n.s. | 16.6 | 16.3 | 98 |
| Any electronic bullying? | n.s. | 13.2 | 20.2 | 152 |

Mean scores are based on Tables 28, 29, rescaled to 0-100.
Higher score means MORE LIKELY to be true for by average respondent.
